| <b>Subject</b>           | <p>VA Imaging would like to inform you that sensor manufacturer Gpixel has terminated the GMAX2505 package used on the ME2S platform with immediate effect and without prior notice.</p> <p>As a result, Daheng Imaging is forced to discontinue the ME2S-560-70U3C camera.</p>                                                                                                                                                                                                                                                                                                                                                                                              |
| <b>Reason</b>            | GMAX2505 color sensor discontinuation                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Manufacturer</b>      | Daheng Imaging                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Affected products</b> | ME2S-560-70U3C                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Alternative</b>       | The MER2-503-36U3C is recommended when a lower framerate is possible in the application. When this is not the case, the MER2-502-79U3C offers a slightly higher framerate.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>EOL date</b>          | Effect immediately                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Recommendations</b>   | <p>We highly regret not being able to provide the product lifecycle we stand behind. The sudden discontinuation of the sensor was outside the control of both VA Imaging and Daheng Imaging and unfortunately leaves no possibility to continue production of this camera.</p> <p>We understand that this may affect existing and planned applications. Our team is therefore available to support you in identifying the most suitable replacement camera and to help minimize the impact on your system design.</p> <p>For any questions regarding existing projects, remaining availability, or suitable alternatives, please contact your VA Imaging representative.</p> |

VA Imaging is always working on updating and improving its portfolio to leverage the possibilities of the latest technologies to meet the requirements of our customers.

Kind regards,

VA Imaging
